Professional Summary

Software Engineer with 3+ years building full-stack applications serving 500+ daily users. Proficient across Angular and React ecosystems with hands-on experience in Spring Boot microservices and Node.js backends. Reduced API latency by 25%, cut release cycles by 30%, and maintained 99.9% uptime across 3 production services. Experienced in on-device LLM integration (Gemma, LiteRT) and CI/CD automation. Fluent in English (C1) with active German studies (target B2). Eligible for Dutch Highly Skilled Migrant visa.

Technical Skills

Languages: TypeScript, Java, JavaScript, Python, SQL, Dart, Kotlin

Frontend: Angular, React, React Native, RxJS, NGXS, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend: Spring Boot, Spring Security, Spring AI, Node.js, Express.js, FastAPI, REST APIs, GraphQL, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase, SQLite

Cloud & DevOps: AWS (CodePipeline, CodeBuild), Docker, GitHub Actions, CI/CD, Vercel, Netlify

AI & ML: Gemini API, LiteRT, Ollama, TensorFlow, Prompt Engineering, LLM Integration, ChromaDB

Other: Git, Jira, Agile/Scrum, TDD, Jest, Cypress, Playwright, Figma, Cross-functional Collaboration, Technical Leadership, Mentoring

Professional Experience

Associate Instructor — Software Engineering Track ESPRIT – Higher School of Engineering & Technology

Dec 2023 – Present
Tunis, Tunisia

- Engineered full-stack applications (Angular, Spring Boot, Node.js, MongoDB) serving 500+ students as the sole engineer on two production systems, cutting administrative processing by 40% with 99.9% uptime across 3 live services.
- Led 7 student Agile squads as technical lead — 5 of 7 shipped to production (72% vs 35% departmental average).
- Introduced GitHub Actions CI/CD and Docker for 3 services, reducing release lead time by ~30%.
- Integrated AI coding agents (Copilot, Cursor), accelerating sprint velocity by 20–30%.

Software Engineer Intern CONTYFIND

Jul 2023 – Sep 2023
Tunis, Tunisia

- Built Spring Boot microservices on a regulated multi-tenant maritime platform; reduced API P95 latency by 25% (800ms to 600ms) via MongoDB optimization and Angular caching.
- Implemented JWT authentication, RBAC with Spring Security, and custom interceptors for cross-cutting request logging.

Software Engineer Intern E-Surveys

Aug 2022 – Oct 2022
Tunis, Tunisia

- Built Angular + Ionic frontend and contributed to Spring Boot/Node.js backends for a maritime survey platform within an Agile team.
- Identified and resolved two load-related bottlenecks during QA before production deployment.

Selected Projects

LocalMind — <i>React Native, Kotlin, Google AI Edge LiteRT</i>	2026
On-device AI Android app running LLM inference entirely locally via a native Kotlin module — zero network calls. Chat, PDF Q&A, voice STT/TTS, and AI coaching timer. TurboModule bridge between React Native and Kotlin. github.com/yassinedhaya/LocalMind	
Auto-Post — <i>FastAPI, Next.js, PostgreSQL, Docker</i>	2026
Full-stack SaaS with 30+ REST endpoints, JWT auth, and 7 integrated job sources (Remotive, Arbeitnow, Greenhouse, Lever, The Muse, USAJobs). Docker Compose, pytest, TypeScript strict. github.com/yassinedhaya/Auto-Post	
Metaxpo — Immersive 3D Virtual Events Platform — <i>React, TypeScript, Unity, Node.js, MongoDB</i>	2025
End-to-end solo build: architecture, backend, frontend, and infrastructure. Reduced API response time by 35% under concurrent load via query batching and Redis caching.	
TRICO — AI Virtual Companion — <i>Flutter, Node.js, Google Gemini API</i>	2025
Google-sponsored competition project — owned prompt engineering and conversation state machine for multi-session context. Voice cloning and user personalization.	
CV-Maker — <i>FastAPI, Electron, React, Ollama, Chrome Extension</i>	2026
Multi-component AI platform with local LLM (Ollama), 7-language support, hybrid ATS scoring (Workday, Greenhouse, Lever, Taleo, iCIMS), and Manifest V3 LinkedIn extension. github.com/yassinedhaya/CV-Maker-Local	

Education

Engineering Degree (Master's Equivalent) — Computer Science	Sep 2021 – Jul 2024
ESPRIT — Higher School of Engineering & Technology	Tunisia
Specialization: Software Systems & Extended Reality Graduated with Honors — ranked top of class twice	
Bachelor's Degree — Electrical Engineering	Sep 2017 – Jul 2020
ISSET Bizerte	Tunisia
Specialization: Industrial Automation & Information Technology	

Languages

English: C1 Advanced (EF SET)	French: Professional Proficiency	Arabic: Native	German: A1 (targeting B2 by end 2026)
